

My patients' hearts

The patients

Greg, Roxanne, suresh, Tomi, Tonya, Jennie, Ricki

The patients

I like taking care of people

To teach and answer questions

Changing lives

Determination

It's what I would want from my doctor

Mentoring the next generation of physicians with critical-thinking skills

Love for patients keeps my heart in medicine

Working with the most amazing coworkers and patients

Connecting with my patients and their families

I keep my heart in medicine because I can see how I change lives every day

My amazing coworkers!

Gratitude

helping

love of medicine

helping others Caring We all need help compassion Helping Respect Helping

others Kindness Hope Caring To see my patients get better and go home

I can help change the way people view health

Healing Humility Hope Making a difference Caring Love Thinking differently

to make life better

I stay in medicine because it continues to be a part of our society where

everyone is welcome and cared for

Being in a position to show kindness and caring to those who feel lost,

hopeless, and rejected

The amazing people I work with

To train the next generation of great clinicians

Being able to help others in need is very rewarding Making people feel better

Being able to care for patients from all walks of life Ability to help people

The fulfillment of helping train the next generation of doctors

Being able to comfort patients and families

I keep my heart in medicine because I can see how I change lives every day

My heart is in medicine because it's not surgery

Patient care Life is precious

Gratitude that's not always expressed
Patient care and improvement Community
The changes that people make to better their lives Working with and being
relatable to immigrant and Spanish-speaking communities
Appreciative patients Helping people
Working with and for others
Engaging with patients on a personal level
The rewarding (even when challenging) relationships
The privilege of helping people through their most challenging times
Human connections Loving my patients Always learning Meaningful connections
Meaningful relationships Listening
Being able to lend a hand at ones most vulnerable times People
